Floors for thought

According to Mark Darnbrough, business development manager of Karndean Designflooring, new-home buyers are attracted to luxury vinyl tiles (LVT) for their realistic designs and durability, "making LVT the perfect choice for any room in the home, including the kitchen".

Darnbrough says a constantly evolving trend in kitchen interiors is the industrial look, incorporating weathered steel effect flooring against exposed brickwork or metallic tiles.

"One way to subtly achieve the look is with flooring. Whereas the rusted effect of our Da Vinci Molten has been popular in bathrooms, the soft tones and subtle patterning of our Cambric has been a big hit in industrial- and modern-styled kitchens."

Party clean up

Premium kitchen domestic appliance manufacturer V-Zug has launched another technologically advanced feature across its range of Adora dishwashers with a new Party Setting.

The programme rinses faster than ever and is able to run up to five rinse cycles in a row and the Adora Dishwasher Collection, claims V-ZUG, is the only model to be manufactured with an integrated high-efficiency heat pump, reducing power consumption by almost half. V-ZUG has been manufacturing kitchen and laundry appliances in Switzerland since 1913 and are sold all round the world, including from specialist showrooms in the UK.

Poggenpohl goes dark

Poggenpohl has demonstrated how to use darker finishes in the kitchen. The new Diamond Grey matt lacquer is matched with the warmth of Honey Brown oak veneer. The handleless kitchen also features black glass-fronted wall units and the recently launched +STAGE breakfast cupboard with pocket doors that pull out and close to conceal the contents.

Like it hot

Perrin & Rowe has introduced a new design to its Instant Hot collection. Perfect for hot drinks, cooking, food preparation as well as cleaning, the Celeste Instant Hot Mixer benefits from classic styling but with the latest cutting-edge technology, offering up to 98°C steaming hot filtered water instantly, as well as hot and cold water. An Anti-Scald locking mechanism provides added peace of mind that steaming water cannot accidentally be dispensed, while a premium nano-technology cartridge filters the water and also prevents limescale build up.

Bespoke Oakeve

The Hurlingham is an imposing manor house in Beaconsfield from Oakeve, with the kitchen, breakfast area and family room running to 1,250ft² – a large, open-plan living space for dining, entertaining and modern living.

Oakeve Interiors designed key pieces of bespoke furniture in-house to complement the appliances, cabinetry and soft furnishings specified for the scheme. The contemporary kitchen includes Sub-Zero and Wolf appliances.

Pure Gold

The PURE SE 3003 R Kitchen from Siematic forms part of a display at leading interior design studio Urban Interior.

Pictured in Lotus White Matt Lacquer and Gold Bronze Aluminium with Silk Gloss and Brushed finish, the PURE Kitchen Collection creates minimalist kitchen design, with a focus on the best materials and craftsmanship.

The suspended central island is finished in Gold Bronze Aluminium, which is naturally accentuated through the silk gloss framing and brushed centre panels, while the StoneDesign worktops consist of a light, two-layered baseboard encased in a fine layer of stone.

The PURE cupboard and drawer interiors are fitted with Siematic's MultiMatic system giving the homeowner up to 30% more storage space. This flexible interior storage system is customisable and available in a combination of aluminium, woods and porcelain.
